Continuation of Attachment(s) 3. Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date: 10/27/06;12/02/04;11/05/04.

***Claims Allowed***

Claims 4, 6-12, 14, 16, 17, 20-22 and 32-46 entered 24 March 2005 are allowed. Claims 1-3, 5, 13, 15, 18, 19 and 23-31 are canceled.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The field of invention pertains to information distribution and filtering and specifically relates to information processing methods for assisting users in sharing information related to transactions conducted over a network

Claims 4, 32 and 38: The claimed invention leverages a buyer's purchase history and a review of an item by the buyer in the purchase history to influence another potential buyer's purchase behavior. The prior on record neither disclose alone nor in combination teach and suggest a permission-based electronic commerce system permitting by a first user a second user access to the first user's purchase information and a review of an item purchased by the first user.

**Closest US Patent/US Patent Publication**

McCollom (US 6,925,444) discloses a business model designed to assist recipients of purchase lists to make a purchases for originators of these lists. Purchase lists under the McCollom system and methods are used as wish lists alone or in association with a gift registry. Purchase lists for items the owner desires may be sent via e-mail to one or more recipients. Under McCollom's system, purchased items are added to a purchase log but McCollom fails to

disclose alone or suggest the purchased log being shared with others for the purpose of sharing purchase history and a review of a purchased item.

Forward and backward citations of McCollom failed to produce prior art that disclose the claimed invention or teach and suggest in combination the claimed invention.

Of interest is Ojha (US 6,598,026) who discloses a business model designed to bring buyers and sellers together in a marketplace. A buyer may share his/her shopping list with friends or co-workers to solicit feedback on the various products, sellers, ask prices. Under Ojha's system, individuals receiving the shopping list may view the page using the Internet browser and access the transaction web site as a user authorized to add comments to the buyer's shopping list, but Ojha fails to disclose the a buyer sharing with others for the purpose of sharing purchase history and a review of a purchased item.

Forward and backward citations of Ojha failed to produce prior art that disclose the claimed invention or teach and suggest in combination the claimed invention.

#### Closest Non-patent Literature

PlanetAll (PTO-892, Item U; Paper #5, PTO-892 Item V) teaches the features of PlanetAll's free online community that allows members to stay in touch with friends, colleagues and groups. Members can share their personal/professional information with friends, colleagues and others using PlanetAll's permission-base system. Although PlanetAll's processes serve as the core for the Assignee's

claimed invention, PlanetAll fails to teach alone or teach and suggest in combination with other prior linking the permission-based system with an electronic commerce entity to permit by a first user a second user access to the first user's purchase information and a review of an item purchased by the first user. Neither PlanetAll article is concerned with sharing historical purchase information and a review of at least one purchased item in combination with permission-based methods. Note: Robertson (US 6,269,369) describes the PlanetAll system disclosed in NPL PlanetAll noted above. Robertson fails to teach alone or teach and suggest in combination with other prior linking the permission-based system with an electronic commerce entity to permit by a first user a second user access to the first user's purchase information and a review of an item purchased by the first user. Robertson is not concerned with sharing historical purchase information and a review of at least one purchased item in combination with permission-based methods. Forward and backward citations of Robertson failed to produce prior art that disclose the claimed invention or teach and suggest in combination the claimed invention.

Regarding Amazon (Paper #5, PTO-892, Items W and X), Amazon discloses Amazon.com purchasing PlanetAll and offers speculation as to the benefits of integrating PlanetAll's web-based address book, calendar and reminder service with the existing Amazon.com commerce system. Either article alone fails to provide an enabling disclosure permitting by a first user a second user access to the first user's purchase information and a review of an item purchased by the

first user. Furthermore, either article in combination with PlanetAll fails to teach and suggest permitting by a first user a second user access to the first user's purchase information and a review of an item purchased by the first user.
